

Running and Exporting a QPS Asthma Referral Report

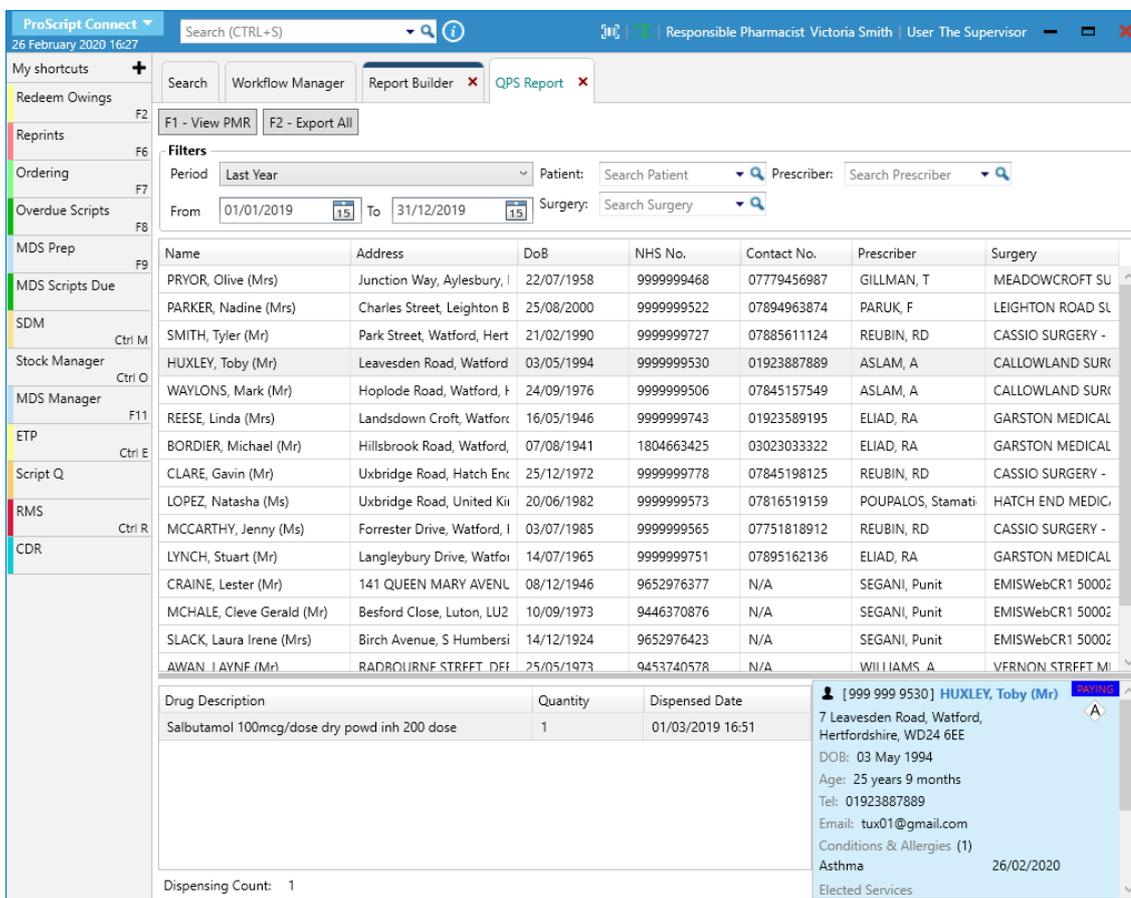

The Quality Payments Scheme (QPS) has been renamed to the Pharmacy Quality Scheme (PQS). The change will be updated in a future version of ProScript Connect.

It is recommended that Asthma or COPD are added as a [condition](#) to patients PMR before running the report. This information will then appear in the blue information box in the QPS Report window. Using this you can determine if the patient has asthma and is eligible for the audit.

1. From the Report Builder, highlight the report you want to run and press **[F10 - Run Selected Report]**.
2. The QPS Report window opens in a new tab, with the list of relevant patients that fall within the set parameters for the selected report.

The previous threshold of 'dispensed 6 or more bronchodilators without a corticosteroid' in order for the patient to appear in the report, has been reduced to 3.

ProScript Connect | 26 February 2020 16:27 | Search (CTRL+S) | Responsible Pharmacist Victoria Smith | User The Supervisor

3. From there, use the filters and search fields at the top of the window to restrict the grid view to the patients you want to include in the report.
4. Press **[F2 - Export All]**.
5. A pop-up window displays, advising you that the report has been successfully exported, and asking whether you want to view the report.

6. Click **[Yes]**.
7. The report opens in Excel.

8. From there you can then:
 - Click **File > Save As** to save the report to an alternative location on your computer
 - Click **File > Print** to print the report for subsequent use

 Once you have saved and/or printed the report, you can flag patient records that require your attention, by using either [adding a counselling note](#), [intervention record](#) or [warning note by editing the Patient Details Form](#).
