

Running and Exporting the QPS Asthma Referral Report for Children Aged 5-15 Years

The Pharmacy Quality Scheme (PQS) was introduced to encourage pharmacists to deliver high quality care to widen their role beyond dispensing. This focuses on clinical effectiveness, patient safety and patient experience.

The Quality Payments Scheme (QPS) has been renamed to the Pharmacy Quality Scheme (PQS). The change will be updated in a future version of ProScript Connect.

1. To begin, open the Report Builder from the ProScript Connect Main Screen by clicking the **[ProScript Connect]** menu button and selecting the *Report Builder* menu item.
2. From the Report Builder, select the **SYSTEM** report named *QPS: Asthma Referral Report for Children Aged 5-15 Years*.

Date Updated	Name	Template Type	Updated By	Last Run	Report Notes
03/01/2019 03:09	QPS: Asthma Referral Report for Children Aged 5-15 Years SYSTEM	QPSChildren		16/01/2019 15:56	For Asthma Referrals

3. Select the **[F10 - Run Selected Report]** button. The report runs and opens in a new tab.

The *Filters* are automatically set for the previous 6 months and can be adjusted if required.

4. Export the report to Excel using the **[F2 - Export All]** button.
5. The Excel Export pop-up opens to confirm the export has been completed. From here, you can select:
 - o **[Yes]** to open the exported file
 - o **[No]** to access the file at a later time from your export folder

This report will only check for a spacer based on the time period selected. If the spacer device is not present in the PMR history within that period of time, the report will show that the patient has not had a spacer device and will appear with a **No Spacer Device** tag. We recommend that you check the full PMR history - or with the patient - to confirm if a spacer device has previously been prescribed.

There may be some instances where a spacer device has been purchased or dispensed from another pharmacy. In this case the Spacer Device record can be added to the patients PMR. This will remove the **No Spacer Device** tag from the report.
