

Sending an FMD Request Using a PTS Barcode

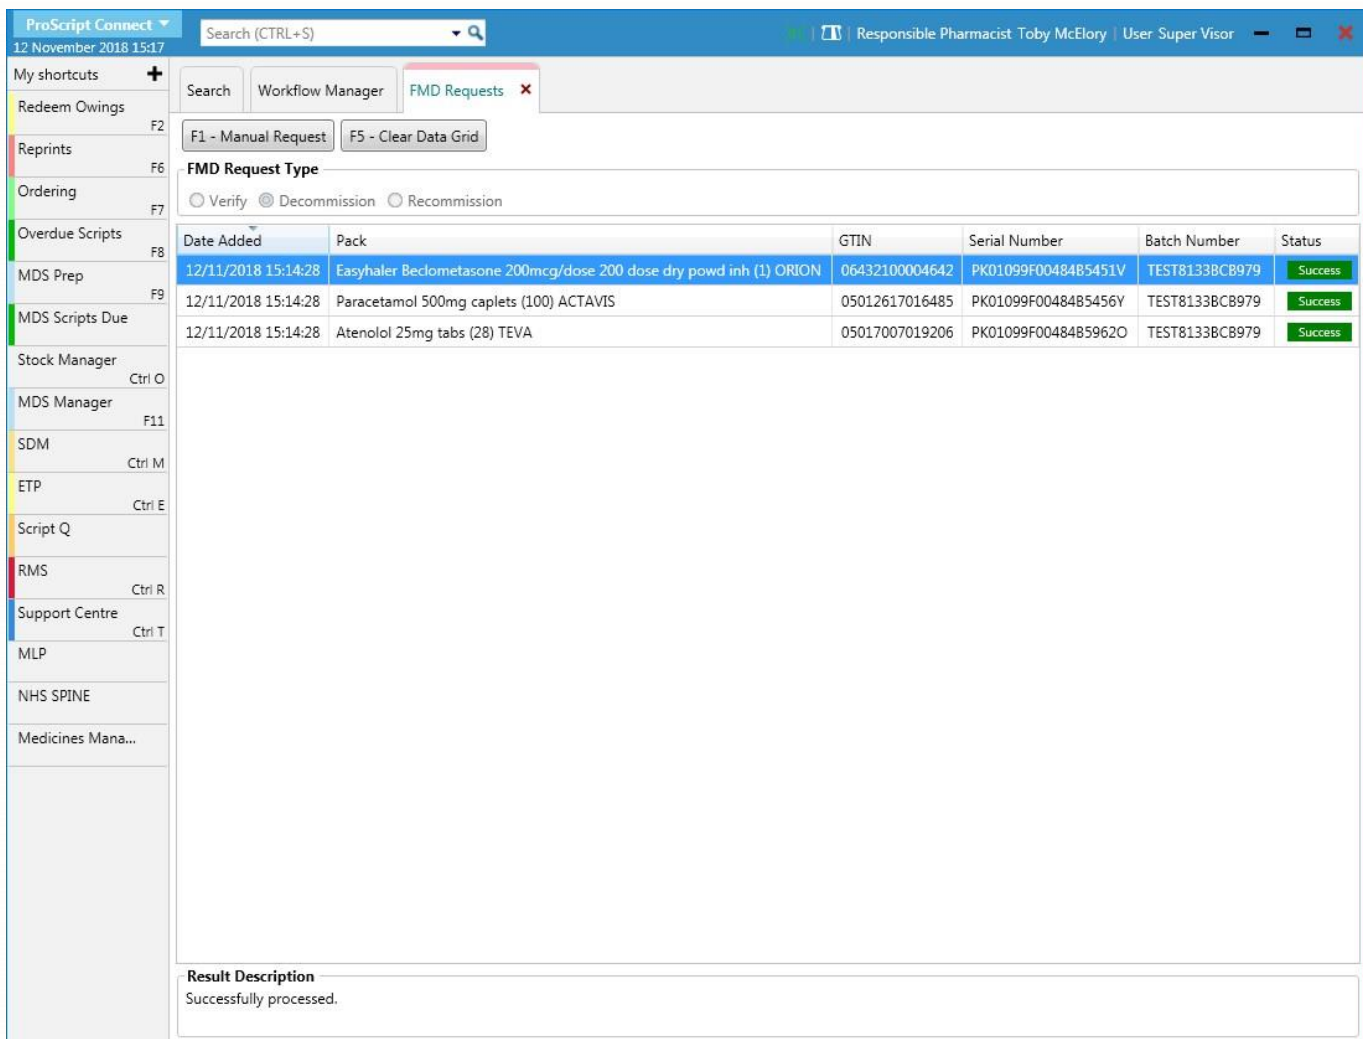

ProScript Connect provides users with the ability to verify, decommission and recommission an entire prescription with immediate on-screen scanning feedback directly from the National Medicines Verification System (NMVS). In order to send an FMD request using a PTS barcode, the dispensed pack(s) must contain an FMD compliant 2D barcode and must be associated to the *Prescription Items* within the FMD Workload.

1. To begin, click the **[ProScript Connect]** menu button and select the *FMD Request* menu item. The FMD Requests window opens in a new tab.
2. Scan your PTS label. A pop-up displays to confirm that you have scanned a prescription tracking barcode, and asks if you want to add all the associated packs to the grid. Select the **[Yes]** button.

If you have already selected your *FMD Request Type* using the available radio dials, this action will be executed on all packs as soon as they're added to the grid.

3. All associated packs for your scanned prescription will display in the grid. Select the request type to send for all packs using one of the *FMD Request Type* radio dials:
 - *Verify* – This will check the medicine(s) against the NMVS database to ensure it is genuine.
 - *Decommission* – This will mark the pack(s) as inactive in the NMVS database.
 - *Recommission* – This will mark the pack(s) as active in the NMVS database. Packs can only be recommissioned within 10 days of being decommissioned.

ProScript Connect 12 November 2018 15:17

12/11/2018 15:14:28	Atenolol 25mg tabs (28) TEVA	05017007019206	PK01099F0048485962O	TEST8133BC8979	Success

Result Description
Successfully processed.

4. The *Status* column will update immediately with a response from the NMVS for each pack. Information provided as part of the response will be displayed in the *Result Description* at the bottom of the window.
- o **Success** – The FMD request was successfully processed.
 - o **Error** – The FMD request has failed. Use the *Result Description* details to help troubleshoot the error.
 - o **Pending** – The FMD request is pending. A response will be provided once reconnected to the network/internet.

Once you have sent all required requests, you can select the **[F5 – Clear Data Grid]** button to clear the grid and repeat the process to send another request type, or close the FMD Requests window if there are no more requests to send.
