

Enabling SMS for a Patient

 You can sign up to use the SMS functionality by contacting your Technology Development Manager (TDM)

Activating SMS takes place at patient level, and requires ensuring that the patient has a valid mobile number saved and SMS enabled within their Patient Details Form.

 The SMS module needs to be enabled within Edit Application Settings and relevant service and log-in details populated in order to use this feature.

1. To begin, search for, locate and select the patient from the ProScript Connect Search Screen. The patient's PMR opens in a new tab.

The screenshot displays the ProScript Connect interface. At the top, the search bar shows "HOLLAND, Clare Susan (Miss)". The patient's details are visible: HOLLAND, Clare Susan (Miss), DOB 01 Aug 1980, NHS No 999 999 9700, Age 38 years 1 month, EPS Status. The Patient Medication Record (PMR) is open, showing a list of medications:
