

Adding a New Wholesaler

1. From the Wholesalers Manager, press **[F1 – Add Wholesaler]**.
2. A blank Add New Wholesaler form displays.

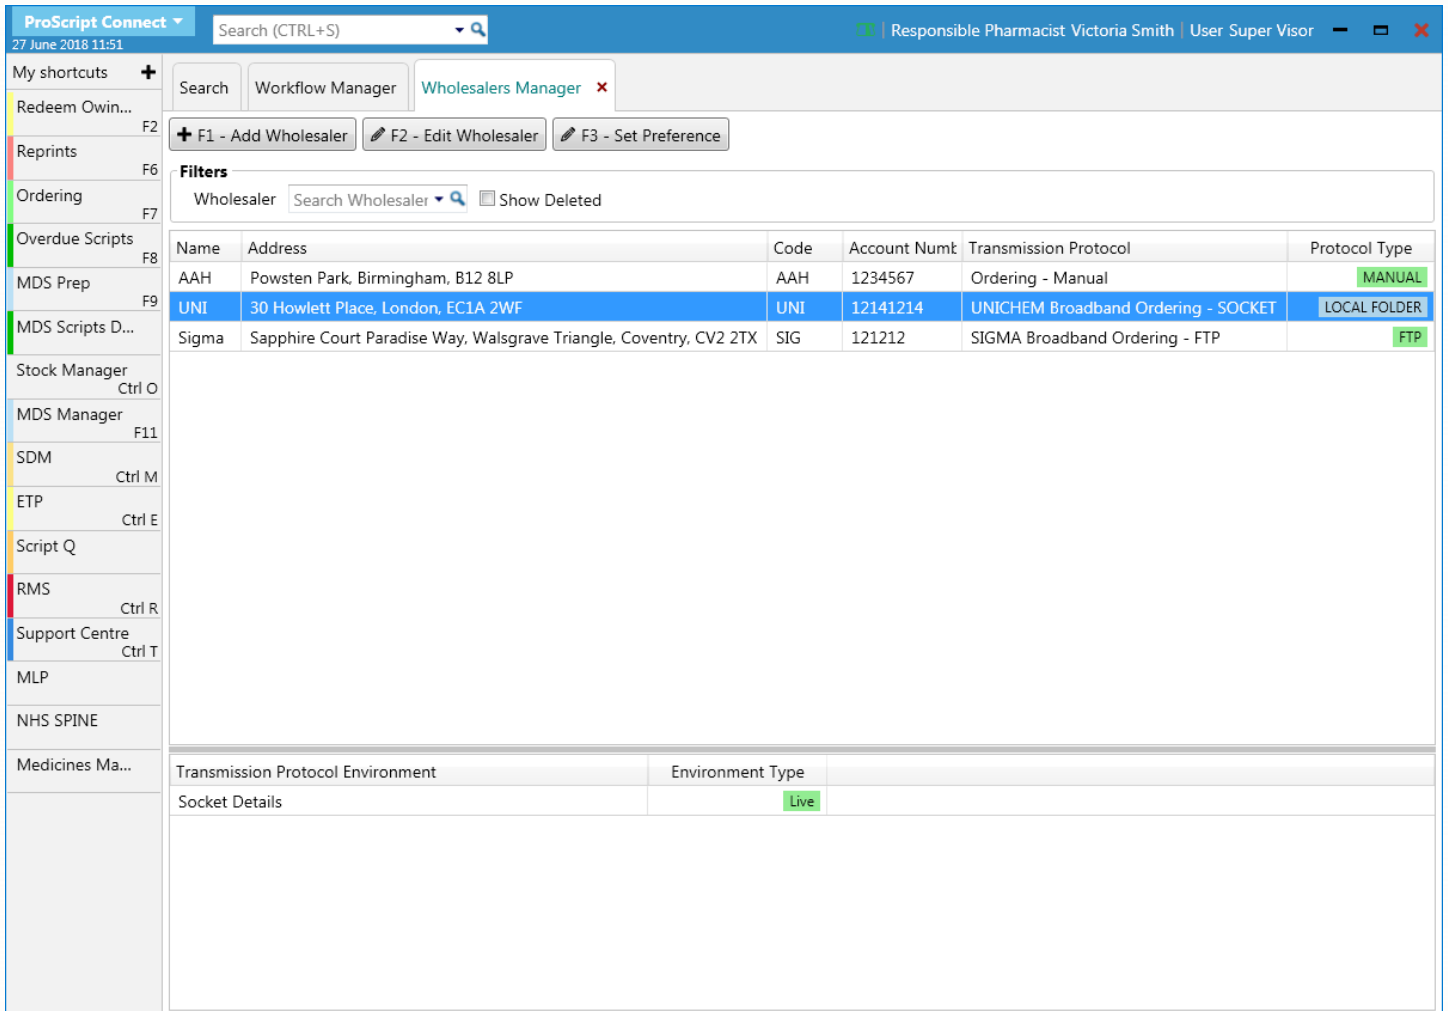

3. From here, you can:
 - o Enter the wholesaler *Name*, *Code*, *Order Message*, *Account Number* and *Depot Id*
 - o Select the *Ordering Type* (either PIP code or AAH code)
 - o Enter the *Address/Contact Details*
 - o Enter the *Depot Address/Contact Details*
 - o Select the *Transmission Protocol and Settings*
 - o Add an additional product catalogue by pressing **[F4 – Add]**

The wholesaler *Code* is a unique short code used to identify each wholesaler within ProScript Connect. The code is user defined, and can be any combination of letters and numbers that helps you to identify the wholesaler. We highly recommend the code is limited to three characters to ensure this is clearly visible within other modules, such as Restrictions Manager and the Reorder Basket.

 The *Account Number* needs to be acquired from the wholesaler.

4. When you are done, press **[F10 – Save]**.
5. The Wholesalers Manager displays, with the newly added wholesaler in the grid.
