# Drug Statistics

The *Drug Statistics* section displays dispensing statistics for the last six months and a summary of stock holding information. This section can be filtered by *Drug* (non-consolidated stock mode) or *Family* (consolidated stock mode). The *Drug Statistics* section is also visible in the PMR when an item has been selected.

💡 You can amend the number of months of dispensing history to display in the *Drug Statistics* section by amending the *Drug Statistics Months* application setting. This can be set to a minimum of *1* month to a maximum of *24* months.

📋 The *Include Drug Statistics* application setting must be enabled to view the *Drug Statistics* in the Stock Record Card and PMR.

Field/Section	Description
By Family/By Drug drop-down menu	Use the drop-down menu to view all information in the *Drug Statistics* section by the individual drug (*By Drug*) or by all drugs in the same family and category (*By Family*).

(Consolidated)	Amending the drop-down menu to show information *By Family* will show information in consolidated stock mode. The (*Consolidated)* text after the *Drug Statistics* heading is a further indication that you are viewing this section in consolidated stock mode, meaning your stock levels and usage figures are combined for all drugs in the same family and category. In an individual item's Stock Record, the figures displayed will vary depending on the item's pack size as seen in the table below.

Total units = 160		
Item pack size	**Pack(s)**	**Unit(s)**
16	10	0
32	5	0
100	1	60
1000	0	160

Max Day	This is the maximum dispensed quantity (in units) dispensed on a single day within the month specified.
Month Total	The total number of units dispensed in the month specified.
Forms	The total number of prescriptions for the item that were dispensed in the month specified.
In Stock	Displays how much available stock you have in whole packs.
Robot Stock	Displays how much available robot stock you have in whole packs.
On Order Pad	Shows the number of packs currently on the *Order Pad*.
Due In	The transmitted and accepted quantity as taken from *Goods In*.
Wholesaler	Displays the item's restricted wholesaler, taken from the Restrictions Manager where restrictions have been applied. Unrestricted items will show no data here.

Suggested Level	The suggested daily quantity to hold in stock. A system calculated mean of the item's maximum dispensed quantity per month over the last 6 months.
Refresh	Refresh the data in the *Drug Statistics* section.
Toggle Drug Statistics Calculation	Turn off the dispensing history displaying in the *Drug Statistics* section. Selecting this button will apply the same toggled setting to all items.
