

Performing an RTEC Check when Sending a Claim

If configured, the application may prompt you to carry out an exemption check for the prescription at the point of sending the claim notification. This will only occur if the exemption check was not carried out during the dispensing process, when sending the dispense notification or was not carried out manually and the patient is otherwise eligible (i.e. not age exempt, prescription is valid, etc). Selecting the **[Yes]** button will flag the script as either **RTEC: Exempt** or **RTEC: Not Known** where appropriate.
