# Performing an RTEC Check when Sending a Dispense Notification

💡 If configured, the application may prompt you to carry out an exemption check for the prescription at the point of sending the dispense notification. This will only occur if the exemption check was not carried out during the dispensing process or checked manually and the patient is otherwise eligible (i.e. not age exempt, prescription is valid, etc). Selecting the **[Yes]** button will flag the script as either RTEC: Exempt or RTEC: Not Known where appropriate.
