

Moving a Failed eMAR to the Transmission History

The eMAR Type application setting, found within the MDS Category, must be set to Enhanced in order to access the eMAR Transmission Manager.

Once a failed eMAR has been successfully resent, it will automatically be removed from the Outbox tab within the eMAR Transmission Manager. In instances such as where the failed transmissions do not need to be resent, you can move these from the Outbox tab to the Transmission History tab.

- 1. To begin, open the eMAR Transmission Manager from the ProScript Connect Main Screen by clicking the [ProScript Connect] menu button and selecting the eMAR Transmission Manager menu item.
- 2. From the eMAR Transmission Manager, open the Outbox tab. Highlight a failed transmission in the grid, which will display with a Failed tag.

12 You can only move failed transmissions to the Transmission History tab

3. Select the [F3 – Move eMAR(s) to History] button.

4. The eMAR will be moved to the *Transmission History* tab, where it is marked with a Failed tag.

You can amend the *Status* filter on the *Transmission History* tab to view *All*, *Completed* or *Failed* transmissions.
