Introduction

Web Restrictions groups the available products both brands and generics into families which share the same ingredients, strength and form e.g. Paracetamol 500mg Tablets.

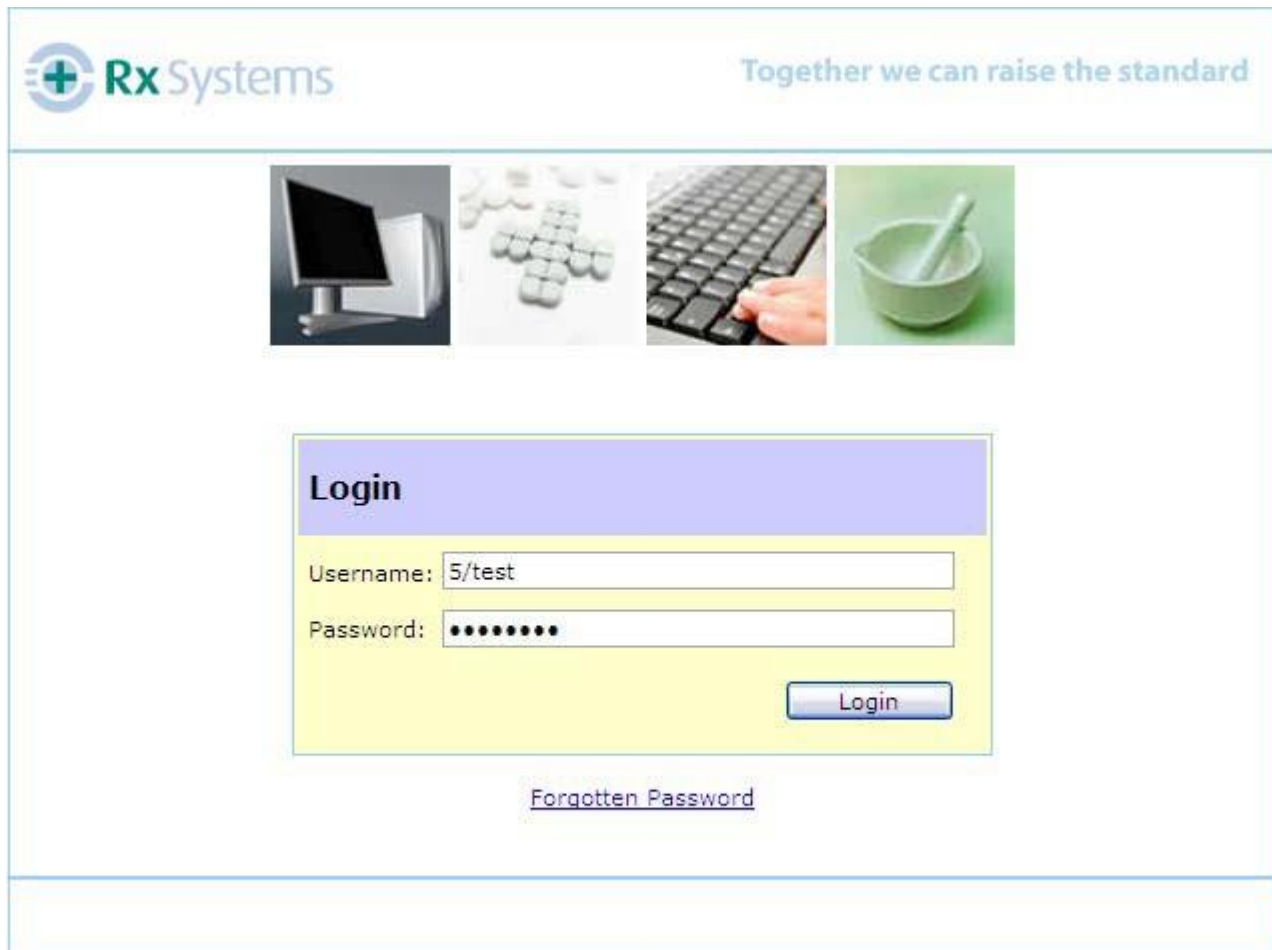

Within a family you can add preferences where you can add one or more products to indicate which choices should be presented to the user for both branded and generic prescriptions, and also a choice of wholesalers too.

This can be used to control which manufacturers' generics are offered, the pack sizes offered and when a brand equalisation is in place and a branded product is offered for a generic prescription.

Logging into Web Restrictions

To login into web restrictions you will need to open internet explorer and type in <http://webrestrictions.rxsystems.net>.

Enter in your username and password into the login area followed by clicking on **Login**. This information will be sent by your Technology Delivery Manager.

Restrictions.NET v1.0 (10/06/2011 01:51:50), © RX Systems Ltd. 2011
Drugs table released 1.0 (10/06/2011 01:51:50)

Main Menu Options

From the Main Menu window the following options will be displayed:

Edit Restrictions: - This option will allow you to view and edit any restriction settings for individual branches.

Publish: - Once you have applied your restrictions, clicking on the **Publish** button will publish all the restrictions for overnight loading to all your branches.

Rollback: - This option allows you to roll back restrictions to a previous version when you last published.

Groups: - **This option is for future enhancements PLEASE DO NOT USE.** If you need to remove a branch please contact your Technology Delivery Manager

Edit Own Account: - This option allows you to edit your own account details, edit user details and also you have the ability to set security levels within your branch.

Admin Options: - This option will allow you to edit user accounts as well as editing group's settings. To edit group settings select **Edit User Account** option where you will be able to create a new user for that group or edit an existing user details.

Edit Restrictions

This option is used for adding, viewing or editing your product restrictions. You can search via drug name, supplier and manufacturer or display all products that have been marked with a restriction.

Scenario 1: Setting preferred generics

To restrict the product choice to generics you will need to indicate which products are your preferred items, this is done by putting a **G** against the preferred products.

All other products in the family which are not marked as preference products will be automatically hidden when one or more product preference has been added to the family. To make more than one pack size available, mark the item with a **G** to be available.

Example: The customer wants **Ibuprofen 200mg tabs manufactured by Teva in an 84 pack default supplier AAH** to be in the product choice list.

Action:

1. From the main menu click on **Edit Restrictions**
2. In the drug name field type in **Ibu 200**
3. Click on **Search**
4. A list of products found will be displayed in various pack sizes.

Rx Systems Together we can raise the standard

RXID:

Drug Name:

Drug Category:

Supplier:

Excluded Suppliers:

LINK Code:

Minimum Price:

Manufacturer:

Show Active Items Only
 Show Discontinued Only
 Show All Items

Exclude Parallel Imports
 Show Restrictions Only

Family Filter is OFF

CURRENT RESTRICTIONS:

1,945 Restrictions are saved for this Branch

An additional 23 Restrictions are applied to Discontinued items

Tip: The Search facility is an intelligent search where you can type in the first word of the product and it will try and find a match e.g. ibu 200. If the return list is very long you can narrow down the results by adding in additional search criteria e.g. searching via Manufacturer.

6. Locate the product, use the drop down list to select the wholesaler and then select the preference from the drop down list. For this example select **AAH** as the wholesaler, and **G** as the preference.

Ibuprofen 200mg tabs (84)	1087725	IBU0121W	G	1.45	TEVA	AAH			Add	View Family
---------------------------	---------	----------	---	------	------	-----	---	---	-----	-------------

Note: To set an item so that it is re-ordered from a supplier, the supplier must already be setup on the system and shop PCs. The required wholesaler will be shown against the item you re-order.

7. Once you have finished marking the changes you must publish the restrictions for overnight downloading. **Please refer to the publish section for more information.**

Result:

8. The product Ibuprofen 200mg tabs (Teva) in an 84 pack will now be shown as the only product choice when the user dispenses it and a generic option for Ibuprofen 200 tabs in ProScript LINK.
9. Additional choices – If you want additional choices, you would then need to repeat steps 2 to 6.

Scenario 2: Setting preferred brands

To restrict the product choice to brand you will need to indicate which products are your preferred items; this is done by putting a **B** against the preferred products. This is more often used for supplier choice.

All relevant products of the same brand in the family which are not marked as preference products will be automatically hidden, when one or more product preference had been added to the family.

Example: The customer wants to only dispense **Subutex 2mg tabs default supplier AAH**

Action:

1. From the main menu click on **Edit Restrictions**
2. In the drug name field type in **Subutex 2mg tabs (RECKITT BENCK)**
3. Click on **Search**
4. A list of products found will be displayed, as shown below.

The screenshot shows the RxSystems interface with the following details:

- Search Filters:**
 - RXID: 5
 - Drug Name: subutex 2mg tabs
 - Drug Category: [dropdown]
 - Supplier: [dropdown]
 - Excluded Suppliers: CLRM,D-E PHRM,DONC,DOWL,G-M,KNT,LEX
 - LINK Code: [dropdown]
 - Minimum Price: [input field]
 - Manufacturer: [dropdown]
 - Radio buttons: Show Active Items Only (selected), Show Discontinued Only, Show All Items
 - Checkboxes: Exclude Parallel Imports (checked), Show Restrictions Only
 - Buttons: Search, Clear Filters
 - Family Filter is OFF
- Product Table:**

Drug Name	PIP Code	LINK Code	Cat.	Price	Supplier	Manufacturer	Wholesaler	AGB	Drug Notes
Subutex 2mg tabs (7)	2588911	SUB0097E	BDZ	6.35	RECKITT BENCK	[dropdown]	[dropdown]	[dropdown]	[Add] [View Family]
- Additional Info:**
 - 1 item found
 - Visible Rows: 200 Rows
 - BATCH UPDATE:** Batch Updates will be applied to ALL items matching the filter above, not just the items on the current page. Includes dropdowns for Batch Wholesaler and Batch AGB, and an Apply Batch Settings button.
 - CURRENT RESTRICTIONS:** 1,943 Restrictions are saved for this Branch. An additional 24 Restrictions are applied to Discontinued items.

- Locate the product, use the drop down list to select the wholesaler and then select the preference from the drop down list. For this example select **AAH** as the wholesaler, and **B** as the preference.

Drug Name	PIP Code	LINK Code	Cat.	Price	Supplier	Manufacturer	Wholesaler	AGB	Drug Notes
Subutex 2mg tabs (7)	2588911	SUB0097E	BDZ	6.35	RECKITT BENCK	[dropdown]	AAH	B	[Add] [View Family]

- Once you have finished marking the changes you must publish the restrictions for overnight downloading. **Please refer to the publish section for more information**

Result:

- The product Subutex 2mg tabs will now be shown as the only product choice when the user dispenses it in ProScript LINK, and the product will be placed on the AAH order pad.

Scenario 3: Setting equalisation deals

To restrict the choice of products that are included in the selection list within a product family to a branded product because an equalisation deal is in place, you will need to indicate which branded products are your preferred items both branded and generically written prescriptions.

This can be done by putting an **A** (meaning **All**) against the preferred products, all the products in the family which are not marked as preference products will be automatically hidden when one or more product preference has been added to the family.

Example: The customer wants to only dispense **Tarivid 200mg tabs whenever Ofloxacin 200mg tabs are prescribed**

Action:

- From the Main Menu click on **Edit Restrictions**
- In the drug name field type in **Tarivid 200mg tabs**
- Click on **Search**

4. A list of products found will be displayed.
5. Locate the product, use the drop down list to select the wholesaler and then select the preference from the drop down list. For this example select **AAH** as the wholesaler, and **A** as the preference.
6. You will need to check if there are any restrictions to the family, otherwise any generics that have a restriction by it will appear when dispensing an equalisation deal.

Drug Name	PIP Code	LINK Code	Cat.	Price	Supplier	Manufacturer	Wholesaler	AGB	Drug Notes
Tarivid 200mg tabs (10)	0482646	TAR0044D	B	7.53		SANOFI AVENTIS	AAH	A	Add View Family
Tarivid 200mg tabs (20)	0482679	TAR0045W	B	15.05		SANOFI AVENTIS	AAH	A	Add View Family
Tarivid 200mg tabs (100)	0482778	TAR0046S	B	78.32		AVENTIS			Add View Family

The AGB setting for Tarivid 200mg tabs (20) has been changed from nothing to A

Visible Rows: 200 Rows

7. Once you have finished marking the changes you must publish the restrictions for overnight downloading. **Please refer to the publish section for more information.**

Result:

8. The product Tarivid 200mg tabs will now be shown as the only product choice when the user dispenses Ofloxacin 200mg tabs.

Publishing

Once you have finished marking the changes you must publish the restrictions for overnight downloading. This will ensure that all your restrictions are applied to all your branches.

From the Main Menu click on **Publish** button.

Before you click on the publish button ensure the information in the box is correct.

Cascade Information

Please ensure the validity of your restrictions before Publishing:

Group Name:

Current Version:

Items in Cascade: (plus 23 Discontinued)

Last Published:

Note: The branches are each allocated a download time between **9pm – 3am**

To ensure that your changes go out, you must publish your changes before **9pm**

Housekeeping

How to remove restrictions on discontinued items

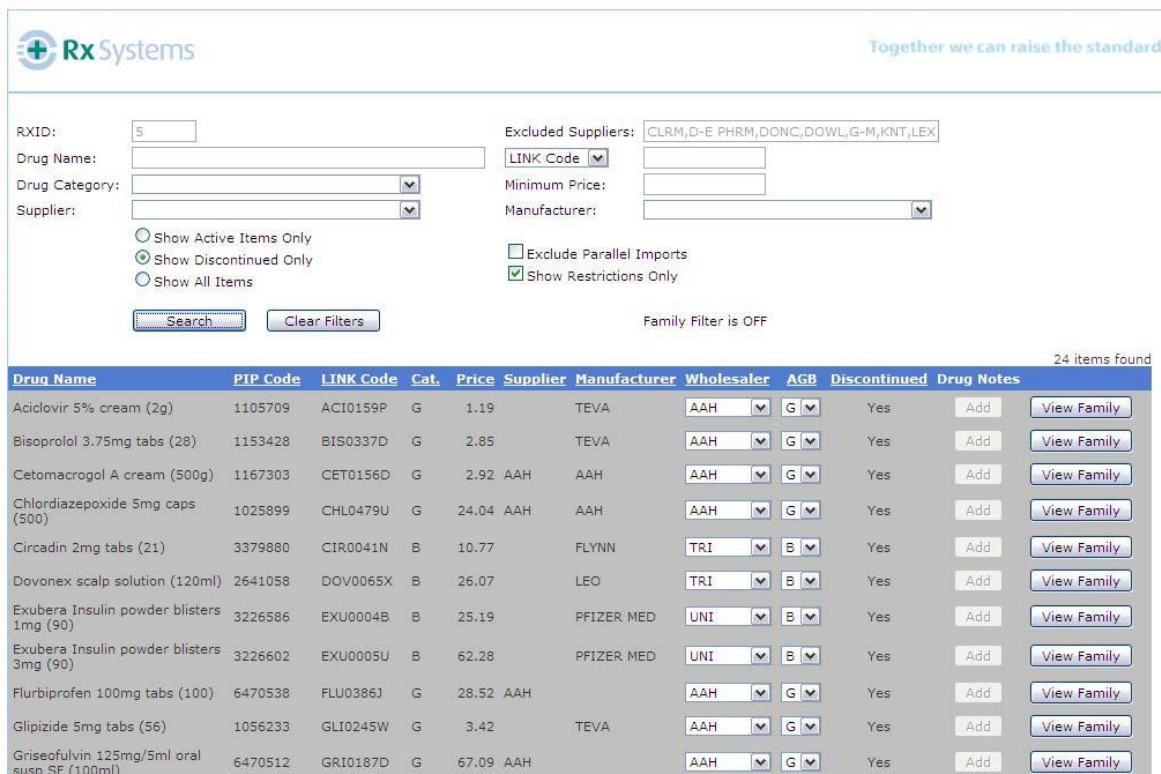

You need to make sure that there are no restrictions applied to discontinued items because they have no effect or value to the restriction file.

Action:

1. From the main menu window, click on **Edit Restrictions**
2. Place a tick in the **Show Discontinued Only** and **Show Restrictions Only** box followed by clicking on the **Search** button.

3. A list will appear with all items that have restrictions against, as shown below.

Drug Name	PIP Code	LINK Code	Cat.	Price	Supplier	Manufacturer	Wholesaler	AGB	Discontinued	Drug Notes
Aciclovir 5% cream (2g)	1105709	ACI0159P	G	1.19	TEVA	TEVA	AAH	G	Yes	Add View Family
Bisoprolol 3.75mg tabs (28)	1153428	BIS0337D	G	2.85	TEVA	TEVA	AAH	G	Yes	Add View Family
Cetomacrogol A cream (500g)	1167303	CET0156D	G	2.92	AAH	AAH	AAH	G	Yes	Add View Family
Chlordiazepoxide 5mg caps (500)	1025899	CHL0479U	G	24.04	AAH	AAH	AAH	G	Yes	Add View Family
Circadin 2mg tabs (21)	3379880	CIR0041N	B	10.77	FLYNN	FLYNN	TRI	B	Yes	Add View Family
Dovonex scalp solution (120ml)	2641058	DOV0065X	B	26.07	LEO	LEO	TRI	B	Yes	Add View Family
Exubera Insulin powder blisters 1mg (90)	3226586	EXU0004B	B	25.19	PFIZER MED	PFIZER MED	UNI	B	Yes	Add View Family
Exubera Insulin powder blisters 3mg (90)	3226602	EXU0005U	B	62.28	PFIZER MED	PFIZER MED	UNI	B	Yes	Add View Family
Flurbiprofen 100mg tabs (100)	6470538	FLU0386J	G	28.52	AAH	AAH	AAH	G	Yes	Add View Family
Glipizide 5mg tabs (56)	1056233	GLI0245W	G	3.42	TEVA	TEVA	AAH	G	Yes	Add View Family
Griseofulvin 125mg/5ml oral susp SF (100ml)	6470512	GRI0187D	G	67.09	AAH	AAH	AAH	G	Yes	Add View Family

4. To remove the restrictions; click on the Wholesaler drop down arrow and change it so it displays nothing (blank).

5. Once you have repeated the above steps on all discontinued items and where appropriate selected alternative products, you will need to publish the restrictions so they can be downloaded overnight.
6. Click on the **Publish** button from the main menu.

Handy Hint and Tips

Setting items to be ordered from a wholesaler other than AAH

To set an item so that it is re-ordered from a supplier other than AAH. The supplier must already be setup on the ProScript LINK system. If you are assigned to a TPOS scheme your products will be passed to AAH as normal.

Example: The customer wants to order **Lipitor 20mg tabs from UNI**

Action: The customer would search and select the product preferred, and then mark the product with a wholesaler of **UNI**

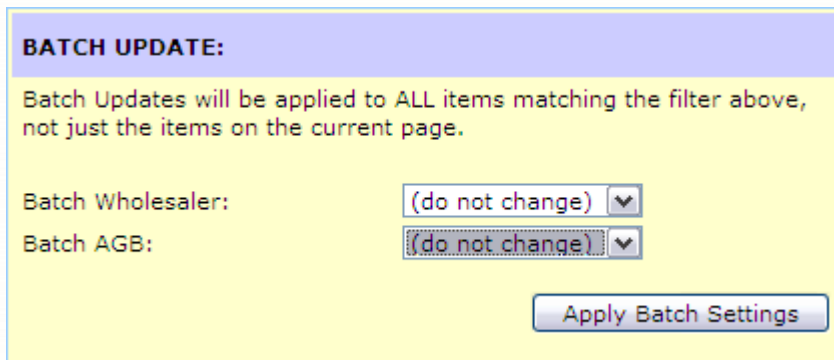

Result: When Lipitor 20mg tabs are ordered, they will be placed on the Unichem order pad.

Batch Update

You can do a batch update where you can apply all the changes to all items in one go rather than individually.

Example: The customer wants to set all **Lipitor** items to wholesaler **UNI** and batch to **B**

Action: The customer would search for the item, scroll down to the Batch Update window at the bottom of the page, as shown below.

Change the Batch Wholesaler and Batch AGB to your preferred choice i.e. UNI and B, followed by clicking on **Apply Batch Settings** button. This will change all the items to your preferred wholesaler with you preferred AGB markers.

Once you are happy with all the changes, you then need to publish the restrictions for overnight loading by clicking on the **Publish** button from the main menu.

Clearing Filters

Every time you need to carry out a new search click on the **Clear Filters** button. It clears all the information out of the fields.

Drug Notes

You can add a drug note against a product simply by clicking in the **Add** button.

Drug Name	PIP Code	LINK Code	Cat.	Price	Supplier	Manufacturer	Wholesaler	AGB	Drug Notes
Tarivid 200mg tabs (10)	0482646	TAR0044D	B	7.53		SANOFI AVENTIS	AAH	A	<input type="button" value="Add"/> <input type="button" value="View Family"/>
Tarivid 200mg tabs (20)	0482679	TAR0045W	B	15.05		SANOFI AVENTIS	AAH	A	<input type="button" value="Add"/> <input type="button" value="View Family"/>
Tarivid 200mg tabs (100)	0482778	TAR0046S	B	78.32		AVENTIS			<input type="button" value="Add"/> <input type="button" value="View Family"/>

The AGB setting for Tarivid 200mg tabs (20) has been changed from nothing to A

Visible Rows: 200 Rows

You can enter in your notes in the drug notes box, as shown below.
