

Adding a New Anticoagulant Therapy Intervention

You can add a new anticoagulant therapy intervention from the Interventions Manager or directly from the patient's PMR.

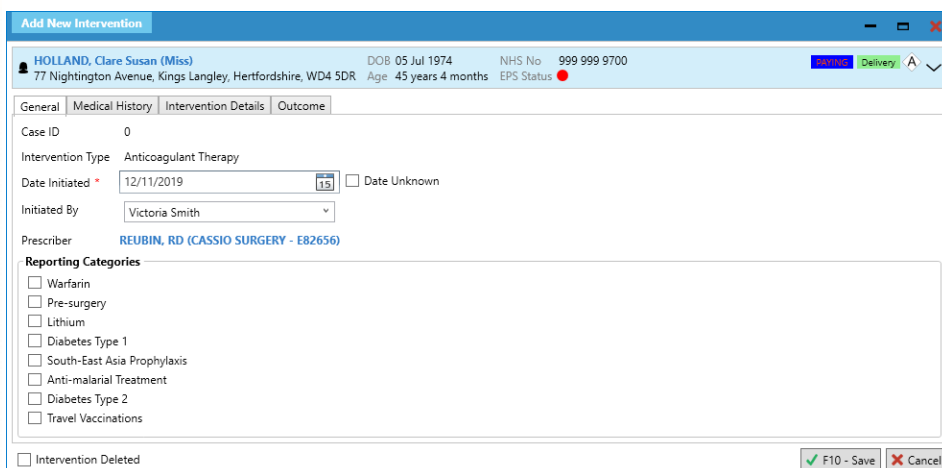

1. You can access the Interventions Manager from the top left-hand corner of the ProScript Connect Main Screen, by clicking **ProScript Connect** > **Interventions**.
2. From the Interventions Manager, click **[F2 – New Intervention]** and select the *Anticoagulant Therapy* option.

3. The Select Patient to Add Intervention window displays.
4. Search for and select the patient for which you want to add a new intervention record.
5. The Add New Intervention window displays, with the *General* tab selected by default.
6. You can now complete the four tabs of the anticoagulant therapy intervention.

Completing the General tab

The *General* tab enables you to enter the date the intervention was initiated, type/select who initiated the intervention, select the prescriber and select one or more reporting categories which apply to the intervention.

Completing the Medical History tab

The *Medical History* tab enables you to select the prescription type, medication related to the intervention, INR monitoring records, and the reason of the anticoagulant therapy.

The screenshot shows the 'Add New Intervention' form with the 'Medical History' tab selected. The patient information at the top includes: HOLLAND, Clare Susan (Miss), DOB 05 Jul 1974, NHS No 999 999 9700, 77 Nightington Avenue, Kings Langley, Hertfordshire, WD4 5DR, Age 45 years 4 months, EPS Status (red dot), PAYING, and Delivery (A). The form is divided into several sections:

- Prescription Type:** Radio buttons for 'New Prescription' (selected), 'Repeat Prescription', and 'Not Recorded'.
- Intervention Medication:** A '+ Add' button.
- INR Monitoring:** Fields for 'Current Daily Dosage (mg)', 'Date of Last INR Test', and 'Date of Next INR Test'. Each date field has a calendar icon and a '15' value. Checkboxes for 'Asymmetrical Dose', 'Unknown', and 'Unknown' are present. A text field for 'INR Result' is also shown.
- Result Source:** A list of checkboxes: 'Oral Anticoagulant Therapy Booklet', 'Letter From GP' (checked), 'Letter From Hospital', 'Letter From Anticoagulant Clinic', 'GP Record Viewer', 'Verbal Confirmation From Patient/Patient's Representative', 'Verbal Confirmation From GP Or Clinic', and 'Other'.
- Reason For Therapy:** A list of checkboxes: 'Not Recorded Or Unknown' (checked), 'Deep-Vein Thrombosis (DVT)', 'Recurrent Deep-Vein Thrombosis (DVT)', 'Pulmonary Embolism', 'Recurrent Pulmonary Embolism', 'Atrial Fibrillation', 'Mechanical Prosthetic Heart Valve', 'Bio-Prosthetic Heart Valve', 'Dilated Cardiomyopathy', 'Post Myocardial Infarction', 'Anti-Phospholipid Syndrome', 'Cardioversion', and 'Other'.
- Notes on Anticoagulant Therapy:** A large text area for notes.
- Footer:** A checkbox for 'Intervention Deleted' and buttons for 'F10 - Save' and 'Cancel'.

Completing the Intervention Details tab

The *Intervention Details* tab enables you to select the clinical significance, reason(s) for the intervention and enter notes if applicable.

If you have selected *Drug Interaction (Risk Of)* as a reason for the intervention, you are able to add the drug(s) that are causing an interaction.
