

## Adding a New Preparation or Pack Note

To begin, open the Drug Notes Manager from the ProScript Connect Main Screen by clicking the **[ProScript Connect]** menu button and selecting the *Drug Notes Manager* menu item.

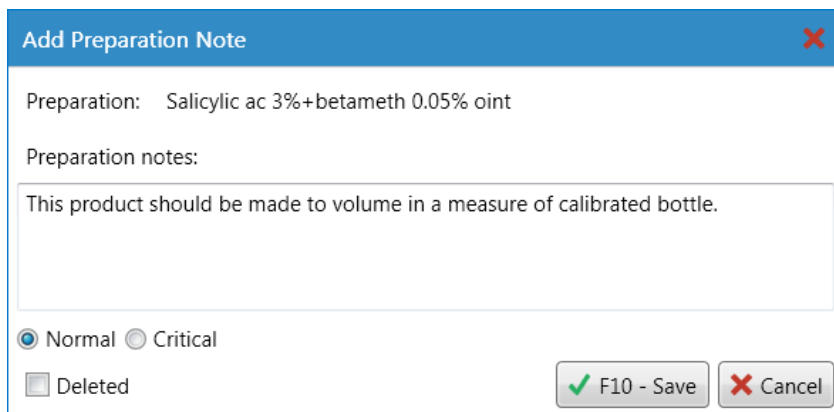

1. From the Drug Notes Manager, select either the *Preparation* or *Pack Note* tab, depending on which you wish to add.

3. Select the **[F1 – Add Note]** button. A search box displays where you can search for, locate and select the pack or preparation that you wish to add a note to. Select the **[F10 – Select]** button.

4. A blank Add Note window displays. Enter the notes in the text field, and complete the remaining sections depending on the chosen note type:
- Preparation Notes: Select the severity level using the *Normal* or *Critical* radio dials, and select the **[F10 – Save]** button.
  - Pack Notes: Enter the *Brand* and *Price* if required, select one of the radio dials described below, and select the **[F10 – Save]** button.
    - *Just show notes*: to only show the entered notes when dispensing the item
    - *Show notes and force price*: to show the entered notes and force the entered drug price when dispensing the item
    - *Show notes and get price*: to show the entered notes and price, but to allow the user to amend the drug price when dispensing the item

**Add Preparation Note** [X]

Preparation: Salicylic ac 3%+betameth 0.05% oint

Preparation notes:

This product should be made to volume in a measure of calibrated bottle.

If you are a branch that has a head office, you can add a preparation or pack note to an existing drug note.

1. Select the **[F1 – Add Note]** button. A search box displays where you can search for, locate and select the pack or preparation that you wish to add a note to. Select the **[F10 – Select]** button.
2. An Edit Note window displays. Any head office notes will appear in the top section of the window. Enter the notes in the text field, and complete the remaining sections depending on the chosen note type:
  - Preparation Notes: Select the severity level using the *Normal* or *Critical* radio dials, and select the **[F10 – Save]** button.
  - Pack Notes: Enter the *Brand* and *Price* if required, select one of the radio dials described below, and select the **[F10 – Save]** button.
    - *Just show notes*: to only show the entered notes when dispensing the item
    - *Show notes and force price*: to show the entered notes and force the entered drug price when dispensing the item
    - *Show notes and get price*: to show the entered notes and price, but to allow the user to amend the drug price when dispensing the item

Edit Preparation Note
✖

Preparation: Amoxicillin 125mg/5ml oral susp SF

**Head Office Preparation notes**

Check that you are giving Sugar Free!

Preparation notes:

Shake well before giving to patient

Normal
 Critical
